**Quarterly Meeting**  
**March 8, 2019**

Abstracts (if available)

**Cyber Security & The Board – a three-part session on the type of metrics and data integral to cyber security reporting to the Board of Directors, and the lessons learned by Fortune 1000 CISOs through boardroom interactions. In this session, security practitioners will learn about how the Board Directors role involves cyber security, the most successful ways in which to capture and report on security metrics, and what additional areas of support (beyond metrics) the Board requires from Security Management. The session will include the following topics**

- **Part 1: Introduction to the role of Board Directors**
  - **Fiduciary Responsibility & Cyber Liability of Board Directors**
  - **What Is Important to Board Directors?**
  - **Cyber Security Trends & the Board**
- **Part 2: Cyber Security Reporting to the Board**
  - **Cadence & Audience of Security Reports**
  - **What Metrics & Information Should Be Included In Board Reports**
  - **Beyond the Metrics; Board Training & Awareness**
- **Part 3: Cyber Security Leadership Through The Eyes Of Business Management**
  - **The Importance of Business Acumen**
  - **Business Finance 101 & How It Relates To Your Security Program**
